FOREWORDS

This great war is being fought on credit. In 8 months we have spent more than in 20 years of Napoleonic war but it only represents a years «savings» of capitalism. On whose credit? Yours. Who grants the credit? The Jews. why? Because you have permitted them to misappropriate that which your labor has produced, the sources of production of the malfederation of misgoverned states called the British Empire.

It is not worth your while to establish your supremacy with your blood over the Germans, if you permit the more insidious enemy the Jew to Poison your blood and to prevent your reaping what shoud be your reward the establishment of a federation of collectivist Governed States, another step forward in human progress and welfare.

I have no animosity against the Jews collectiuely or individually except as the best exponents of individualism and the inveterate enimies of collectivism except in relation to trusts and monopolies and as the credit mongers of the world.

A race that is not a nation cannot be permitted to enter into the government of collectivist states in any executive capacity.

Wheher treated as a freeman as in England or ill treated and persecuted as in Russia the centuries have proved the impossibility of any nation assimilating or absorbing the Jewish race their customs and instincts render it impossible.

If the jew refuses to found his own Individual State, he must accept the hospitality of other nations conform to their laws and customs and not seek executive government office or to amass riches for his individual benefit.

The Jew knows and admits he lives as a microbe on the vices of humanity the greatest and most profitable to him of which is war.

For his own Good and what is of greater importance for the good of the majority of mankind the Jewish rale must be aided to create their own state and nation.

The British Empire is large enough to give them all the territory they require and to repay them for the undouted services they have Rendered to the Empire in the past when civilization was at a lower ebb.

G. B. S.

March 1915.

BRITISH DEMOCRACY

TO THE

BRITISH DEMOCRACY

AND TO

The democracies of France Italy and Spain

The fruit of Individualism, Capitalism, and Judaism, is the great war the life or death struggle in which we are now engaged and are likely to be engaged for some years to come.

The destroyers of the human race, the torturers, murderers and mutilators of men women and children are individuals and individualists.

No Collectivist governed Nations or races would ever have had the will or the power to commit their respective races to a war of races conducted with the most hellish barbarity and savagery the world has seen before or since man has proved his ability to control most of the forces of nature both for his welfare and his destruction.

On the one hand certain individualists of our race

pose and preach as humanitarians and claim for our race all the virtues of Freedom Progress Humanity Justice Civilization Culture and Progress and above all as being the nation most endowed by character to lead and if need be to force on less enlightened nations the observance of these virtues.

At the same time the same individualists of our race (with reason) damn the Germans and Austrians as the slaves of military despotism and as savages and barbarians. What these individualists overlook is that while the German and Austrian democracies are the slaves of militarism, imposed by individual individualists we the democracy of Britain are no less enslaved to individualism which means the exploitation of the nation and the race by a limited number of individuals for their personal benifit and enrichment at the expense of the welfare and possibly the life and the existence of the nation and the race.

Individualism or Capitalism which are convertable terms were condemned before certain individuals determined to compel five enslaved races to fight for supremacy to the death, for what? Individual capitalist imperialism or collectivism?

After seven months of war we can say our naval supremacy is maintained and that the probabilities of the loss of our naval supremacy are of the remotests, although the German fleet is still in being and this at no great cost or effort to the nation.

What threatens the life of the nation and the race is

not the prospective loss of naval supremacy but the selfishness and incompetency of indivdualism and Capitaism to conduct a great terrestial war of defence in the interest of the nation and our French and Belgian allies, Frace and Belgium having become geographicaly the bulwarks of Britain.

Individualism and Capitalism and Judaism are not engaged in an effort to create a great national army of self defence based on national universal obligatory service, on the contrary all their efforts, are directed to one end viz to become individually rich and to prey on the misfortunes of the nation like birds of prey on the battlefield.

Their operations may be classified as follows.

1. To coerce the starving unemployed that before the war had neither the right to work nor the right to live to enlist.

2. To coerce the employed to enlist.

3. To import labor (slaves) of all nations and color to supplant British workers as far as possible to break the syndicates and unions.

4. To employ child labor with a like object.

5. To substitute for the slaves of all nations which constituted the crews of british shipping before the war blacks as cheaper still.

6. To diminish wages which did not constitute a living wage before the war.

7. To create further rings and trusts and monopolies and to enhance the cost of most of the primary neces-

sites of life in some cases cent per cent without any justification and to make life impossible for the workers, their slaves, whether engaged on work necessary for national defence or for the enrichment of the individual capitalist.

8. To fill their workshops with work the most profitable to them as individual traders and refusing or neglecting the work necessary for national defence.

9. Jewing the nation by conspiracy with the Government and its agents in relation to every War office and Admiralty Contract.

10. To pay the dependents of the army enlisted by coercion absolutely inadeqnate seperation allowances and pensions.

11. To treat the wounded in Hospitals as quite secondary to their amusements and to make no proper provision for extended hospital accomodation when the country is full of palaces easily convertible.

12. To forther tax beer and other articles of primary necessity, to double income tax on small incomes. Refusing to subscribe for Government loans and aiding and abetting or compelling the Government to float paper credits with the Jews for huge and unnecessary amounts.

The cosequent loss of the gold standard in International commerce and exchange.

13. The supression and falsification of most news connected with the war and the establishment of an inquisitorial terrorism.

These are some of the causes that are ruining the nation and the race and which will leave the nation or

what is left of it at the end of a long protacted war of which no man can see the end hoplelessly ruined impoverished and doubly enslaved to Individualism Capitalism and Judaism.

In the interest of Humanity, Imperialism whether it takes the form of a British Empire of Individual Capitalist Despotism or a German Empire of Individual military despotism are and will continue to be a curse to human welfare and progress.

The dream of the British democracy of a collectivist Constitutional Government and Federation of British states based on the social doctrines of socialism was, but a dream nearing its accomplishment.

At the outbreak of war the downfall of Individual Capitalism was very near not only in Great Britain but also in S. Africa Canadá and oter British «Possesions» or crown colonies to use the language of Individualism and Capitalist Imperialism.

We have coquered the world in the rough school of the Darwinian theory of evolution «The survival of the fittest».

We have policed the seas of the world free of cost to other nations.

We have cast on the scrap heap foulr or five first class ravies that we have never used for agressive warfare.

We have kept the peace of the sea for a century no mean accomiplishment and one which entitles us to claim the lasting appreciation of humanity of all races colors

and creeds and philosophies and particularly of the latin races.

We destroyed the greatest military despotism with which the world has been cursed until the birth of the present and greater danger.

In the course of a twenty years war of which we bore the brunt of the cost in blood and money we released Europe from the military despotism of Napoleon and it is thanks to our efforts that today France, Italy and Spain can claim to be nations and Souverign Independent States.

We have kept the peace in Europe to the best of our ability since.

What we have we hold and no nation on earth can claim that we are not entitled to continue to figh for and to hold in the name of the British Democacy that which we have gained and which has cost us so much work blood and treasure and which the the British Democracy treats as a trust for the human race. Mere conquest and military despotism has never been our obiect.

Our sole obiect has been to Render habitable and to impose the first laws of liberty humanity and progress on the wild and savage places of the earth.

We have never wilfully attacked a civilized nation in Europe.

When we attacked America, it was not the attack of the British democracy but of an individualist, a king, a German military despot, imported from Germany, and he Received his reward at the hands of the then British de-

mocracy in America, in the declaration of their independence.

The united states of America are an indipendent soverign state, but its democracy is still British at heart and is fighting the battle of collectivist freedom as stringentlyas ourselves, the evils of individualist capitalism being as great in the united states as in the British Empire.

We are as much a latin race as the french Italian and Spanish both by blood and language and century by century are becoming more so.

Britain saw five hundred years of Roman occupation, and five hundred years of French domination and the Celtic components of our race are by far the most prolific. The scandinavian and germanic traces have almost disappeared in the course of the centuries.

We have never been hostile to the democracies of the latin nations.

We have never as a democracy had any sympathy with the germanic races for the reason that they have not yet emerged from barbarism and feudalism.

We have always fought the battles of the latin races for freedom liberty of thought and progress.

To day the democracies of the latin races are with us and if they have profited by the close relation that has existed between us during the past century in relation to progressive ideas of liberty humanity and latin culture, they will lend us their aid in work blood and treasure to destroy once and for all Prussian German and Austrian feudalism and military despotism.

If Italy or Spain become traitors to the common cause it will only be because the democracies of Italy and or Spain have been sold by the corruption of gold by the individuallsts of capitalism to be found in their governments which unfortunately are as tainted as our own by these influences.

With a view to proveing the hone-ty of purpose of the British democracy I have somewhat diverged from my original purpose of placing before the British democracy the dangers which confront the nation and the race if the war is not brought to a succesful conclusion within a reasonable space of time and outlining the course to be adopted to prevent the nation in the course of the war falling into an abljct state of coerced slavery inferior to the slavery of the Prussian military despotism.

To work at high pressure or to fight men must be well clothed and fed.

Before the war the workers of England were badly paid and housed and worse fed and clothed and their case is rapidly becoming hopeless.

British Individualist Capitalism by shouting the word Patriotism (a word capitalism is totally unable to understand or understanding does not apply to its own actions as it is contrary to all preconceived noti ns of Individualistic capitalistic phylosophy) has coerced the workers of Briton into the trenches and has made and continues to make every effort with and without Government interference to destroy Unionism and Syndicalism in relation to

the workers that remain even going the length of importing labor bosses from America, i. e. slave drivers.

The women and children of the absent minded beggars that have been coerced into the trenches can starve on the half of nothing not regularly paid once a week and the absentminded beggars themselves when blinded disarmed dislegged with bullet holes in their brains and intestines can lie about in racecourse sheds and be shifted to make room for champagne luncheons of the Apostles of Individualism to which they are not invited.

In the face of the enemy I do not wish to preach Revolution but I do preach passive resistence until such time as the Government shall in the interest of the nation take possession (without compensation) of that which is allready the property of the nation, viz every railway, workshop and industry in the kingdom and run it in the interest of the nation and of national defence and the same with the mines and most important of all the shipping, the land, and the houseing accomodation.

Now is the time for the workers the Democracy of Britaim to strike the death blow at Individual Capitalism.

If they wait until the war is over it will be too tate.

The men who have worked for and the dependents of those who have died for the nation will be treated as they allways have been in the past, as paupers and outcasts, as the waste of Capitalist Imperialism to be cast on the scrap heap, to stave, and to die, and to see the Empire of Individual Capitalism richer and more powerful than ever, the syndicates and Unions broken for a century and

the workers of Britain represented by a motley collection of blacks yellows and whites the pure slaves of Imperialistic Capitalism of the Roman or would be Prussian order.

Is the present government capable of a pacific revolution of this order?

I doubt it, unless you are prepared to declare Lloyd George Dictator for the continuance of the war and i can see no man living in whom the democracy should put more faith as a Dictator severed from his surroundings more paricularly Baron Schroeder, Rufus Isaacs and other tainted members of the government and theirs agents. We are fighting for our existence as a nation and a race and only drastic remedies will enable us to carry the war to a succesfull concluslon.

The Prussians are trying by diplomacy and crocked fighting to gain that which they can never hope to attain by square fighting, viz world supremacy.

The German Empire is not yet born and never will be.

Before the declaration of war the Prussians were not fighting for their existence they are now.

The markets of the world were open to them more particularly the British markets, as the democracy of England had refused to adopt a protective system at the bidding of the conservative party the apostles of individual Capitalist Imperialism, which would have been a severe blow to German commerce and might have justified their claim that they were compelled to fight for their economic existence.

The Democracy of Britain has always been and always will be a free trading democracy for the reason that they know that fictitious protection is and can only be in the interest of the individual and contrary tho the interests of the collectivity.

Individual Capitalism was a chapter in the evolution of man, it has served its turn.

It has produced a small percentage of men of highly developed brain power.

It has produced more luxury for the minority than is good for them mentally or physically.

It has ruined mentally and physically the majority, effects which if not arrested and remidied mean not only the death of empires and nations and of races, but a set back of centuries in the advancement of humanity.

The fighting unit of the past has been the individual pitted mot only against all the forces of nature but against all the forces of subjection that his own species can bring against him individually and collectively.

The fairy tale of inicial sin which cast its yoke on humanity for so many centuries has been nearly lifted.

Man begins to realize except in the limited number of cases where he is still the victim of priestly hallucinations, that man has made himself that which he is, and will make himself that which he will be, god of this world.

He begins to realize that he is neither good nor bad, that all he coverts is life and the right to live his life under the same conditions as his fellow men with not more luxury and not less than science and industry can give

him and with not more leisure and not less than his fellow men.

Man begins to realize that there is no reason why life should be made a hideous nightmare of gross luxury, vice, disease, poverty, starvation, murder, mutilation, coercion and slavery.

Man knows that human knowledge in its present advanced stage can create a state and govern it in the interest of the collectivity, in such a manner that all these evils will disappear.

The great forward movement in France and Belgium promised by our military dictator, lord Kitchener, for the spring, what fruit will it bear?

I humbly submit none, save huge losses and mutilations to the coerced workers of Britain and Greater Britain of France and of Belgium.

The modern rifle without artillery and all the other inventions of hell in the hands of determined men who can use it, render all advances impossible, and flanking movements are practically barred if the present line is maintained.

After Lord Kitcheners painful experiences of protracted war in S. Africa, of which the proximate cause was his Despotic Prussian Highness, i humbly submit as a rifleman that the allies would be better employed in perfecting the defences of the line than hazarding their all in a gamblers throw, until the day when all artillery and rifles are worn out, and no more amunition is available when we will settle it with cold steel and fists, not with a

view to imposing on the world the Individual Capitalists idea of a modern Roman empire, but with the object of creating out of the ashes of capitalism a federation of collectivist, collectivist governed states, to shelter man the unit from at least some of the forces of mans own creation which threaten to destroy the human race more surely than the forces of nature which threatened to exterminate man when he was fighting the great battle against nature for a footing in the world superior to that of a wild beast and in the course of which he has succeeded in transforming himself collectively into god of this world, but at the same time has fostered in his ranks individuals more devilish in their attributes than the pen of a Dante could describe.

Again i say to the workers of Britain and greater Britain deliver your ultimatum to Lloyd George.

Compel him to sever his connection with the Apostles of Individual Capitalist Empire, and do not take up your tools until you have secured your object.

If Lloyd George refuses or fears to lead seek another Dictator, England found one in Cromwell, why not again?

This bloody war, this bloody crime against humanity is the work of the fiend disguised as the Individual Capitalist supported by his sycophants the priests of all denominations and the Tews.

Humanity was awakening to the fact that this worlds riches are the property of the Collectivity who create them and not of the Individual.

The Individual seeing that the false doctrines of Individualism and the so called Religeons would no longer deceive the collectivity and fearing Revoluction determined to destroy and weaken the Collectivity and to cast them back centuries into the Barbarism and Slavery of a Roman Empire. Will Individualism succeed?

This is the real issue of this bloody war.

Individual Capitalism will not suceed.

The collectivity of Humanity have a double obligation, to destroy the Germanic Individualist power and the Brittanic French and Russian Indivualist power at the same time.

Humanity requires no supreme War Lords either of the sea or the Land or the Air.

The world only requires Collectivist governed pacific states, with a common agreement to destroy any nation tha arms for agressive war.

The Germanic Individualistic power has armed for agressive war and has to be destroyed in the interest of mankind, but at the same time the Individual Capitalist fiend is enriching himself at the expense of the men who have shed and are shedding their blood for Humanity.

The Germanic Individual Capitalist fiend having been destroyed, the collectivity of the passivist states will have to continue the war in their own camps and destroy the Individuals and the Individualism that has cost them so many million lives, so many million mutilations and so many sufferings to the women and children of their respective races, and that is seeking to create fictitious lia-

bilities to chain them to the Jews for a century. The war of Individualism conducted by individual Capitalism may last years, the longer it lasts the greater the satisfaction of Individual Capitalism, the greater the Individual plunder, the last pound of flesh being obtained out of the male and female slaves to the tunes of Patriotism Tipperary and Brittania Rules the Waves and the greater the weakning of the collectivity, as the dole called weekly wages is within forty eight hours returned to the Individual Fiends pockets for shoddy clothing insanitary dwellings, poor food bad beer and worse whisky.

The end of this bloody war, this bloody crime against humanity, of the fiends of Individualism is only the beggining of the Greater war of the collectivity against Individual Capitalism and their sycophants the priests of all denominations and the Jews.

The Greater War of Humanity against Individual Inhumanity.

The greater war of Reason against the modern and amplified doctrines of Shylock.

The greater war in which peace will only be declared when the false doctrine of the Individual owernership of property has been destroyerd for ever.

When man the busy bee shall learn to work for the first time in his history for the collectivity and not for its destruction.

The blood of the victims of the Fiendish Individualism which is so richly manuring Europe will produce good corn and the Collectivist interpretatión of Liberty

Equality and Fraternity will have been born, and the asas sination of Jaurez and Ferrers and the thousand and one crimes of Individualism against Collestivism will be avenged.
